***Through compassionate care and clinical excellence, BCI is dedicated to serving the behavioral health needs of Okaloosa County residents.***

For over 50 years, BCI has provided care to those affected by mental illness and/or substance use disorders. We have added best practice service deliveries and evidenced based treatment modalities. During this year, BCI initiated Vivitrol therapy to address the opioid epidemic through a grant with FADAA. Also during this year, through legislative funding, BCI was able provide a case manager to the Ft. Walton Beach Medical Center's Emergency Department for care coordination. While BCI serves over 9,000 patients and clients annually, there is still so much more to be done. We plan to expand children and family services as well as adolescent substance use disorder treatment. Thank you to all of our community partners. **When we come together to support those in need, we can build a community that has sustainable and life-changing programs and services for all Okaloosa residents.**

We are a sustaining member of the Okaloosa County Early Childhood Court.

BCI provides Adult and Youth Mental Health First Aid training to all members of the community .

### Administrative Costs
